**ACCEL/Exchange Transaction Volume Grows 46% in 2005  
New Clients and Merchants Join at Unprecedented Pace**

**Brookfield, Wisconsin, February 9, 2006** — The ACCEL/Exchange Network, owned and operated by Fiserv, Inc. (Nasdaq:FISV) through its Fiserv EFT business unit, today announced record transaction volume and unprecedented membership and location growth in 2005. The Network, currently the nation's third largest based on total transaction volume, grew its in-network transaction totals by 46% in 2005, signed 400 new members – including over 210 credit unions – and added 60,000 ATMs and 200,000 point-of-sale (POS) locations during the past year. ACCEL/Exchange transactions are now enabled at more than 100,000 ATMs and 500,000 merchant locations throughout North America.

Year-over-year transaction totals were 410 million in 2005 versus 281 million in 2004. The Network's ATM transactions were up 27% from 41 million in 2004 to 52 million in 2005, and POS transaction activity increased by 49% from 240 million in 2004 to 358 million in 2005.

“ACCEL/Exchange delivers everywhere, every time convenience to consumers and significant economic value to financial institutions, ISOs and merchants,” said Kevin Gregoire, executive vice president of Fiserv EFT. “Our new client and merchant signings are rapidly increasing the Network's visibility, creating powerful momentum for us in the marketplace. The value inherent in the Network has been unlocked for everyone in the payments stream. The ACCEL/Exchange message is out: we provide superior access, performance and value.”

In addition to national ATM and point-of-sale access, the ACCEL/Exchange Network continues to expand its key services, including its Deposit Sharing program that enables cardholders to make deposits at participating member ATMs, and its NoSurcharge Alliance program that gives cardholders access to surcharge-free ATMs.

“2005 was a banner year for ACCEL/Exchange,” said Michael Williams, senior vice president of Fiserv EFT. “The Network is a leading provider of high-quality, high-value transaction processing services. Network consolidation has significantly narrowed the payments channels available to our marketplace. This consolidation has caused financial institutions, ISOs and merchants to take a new look at ACCEL/Exchange, and not surprisingly, they like what they see.”

In addition to managing the ACCEL/Exchange Network, Fiserv EFT provides ATM and debit services to more than 2,700 financial institutions across the United States. The business unit operates more than 17,000 ATMs and currently processes approximately 435 million ATM and debit transactions per month, making it one of the largest electronic funds transfer (EFT) processors in the nation.

Fiserv, Inc. (Nasdaq:FISV) provides information management systems and services to the financial and health benefits industries, including transaction processing, outsourcing, business process outsourcing and software and systems solutions. The company serves more than 16,000 clients worldwide, including banks, credit unions, financial planners/investment advisers, insurance companies and agents, self-funded employers, lenders and savings institutions. Headquartered in Brookfield, Wis., Fiserv reported \$3.4 billion in processing and services revenues for 2004. Fiserv was ranked the largest provider of information technology services to the U.S. financial services industry in the 2004 and 2005 FinTech 100 surveys by the American Banker newspaper and the Financial Insights research firm. Fiserv can be found on the Internet at [www.fiserv.com](http://www.fiserv.com).
